

# Visiotech Body Camera Range

The Visiotech Body Camera range is a state-of-the-art award winning wearable video recording device that offers real time, high quality audio and video streaming together with GPS location mapping. The high-definition video and incredible low-light capability, allows lone workers, law enforcement and security agencies to better protect their people and assets and provides an accurate record of events that can be used for legal documentation.

## Visiotech VS-2

### Key Features

- GPS location mapping back to a monitoring control centre
- Provides agencies with improved emergency response times, staff safety and active intelligence
- Users can set their own encryption key providing the ultimate security for the stored video on the device
- Field staff have the ability to alert a central command centre of live events with the touch of a button
- The DEMS Live Camera Management Software dynamically tracks all field staff locations and can monitor the live video and audio of a team of deployed personnel
- Supports photo snap shots, video and audio recording, local storage and infrared night vision

SIDE

REAR

## Visiotech VC-2

### Key Features

- Built in GPS location recording
- Provides up to 14 hours of recording time
- Supports photo snap shots, video and audio recording, local storage and infrared night vision

## Docking Station

The Visiotech 8 Port Docking Station is the latest charge and data upload device designed for use with the Visiotech Body Camera Range. Users can connect 8 body cameras to the Visiotech DEMS Docking Station PC.

### How to use

- Connect the Docking Station to the PC running the Visiotech DEMS Docking Station software.
- Power on the Docking Station
- Dock/Connect the body cameras one by one
- The body camera data will be uploaded to the DEMS Docking Station PC and the camera will start charging
